

Sprint 3**PRODUCT GOAL:**

A login and sign in website

PRODUCT BACKLOG

User Stories	Definition of Done	Difficulty (1-5)	Priority (1-10)	Sprint Number
Coming up with an idea	If the concept of the product is finalized	2	10	1
Coming up with design	When the wireframe of the website is completed	3	5	1
Making the Video	Once the video has been recorded	4	9	1
Visually creating the website	Once the wireframe of the website can be seen	5	8	2
Creating codes that would actually function.	Once the services that the web owner is functional	5	10	2
Recording the video	Once the video has been recorded	3	8	2
Learn how to make a backend	Once the web owner is able to understand operating the server	5	10	3
Open and operate the server	Once the server can be accessed from other devices	5	10	3

Making the final Video	Once the videos for sprint 3 are done	3	7	3
------------------------	---------------------------------------	---	---	---

Sprint 3 Goal:

Learn a framework for the backend and database.

Time Spent

Two Weeks My work starts from 8 am to 10 pm

	Monday	Tuesday	Wednesday	Thursday	Friday	Saturday	Sunday
Week 1	Spent a bit of time to study	Spent a bit of time to study	Spent a bit of time to study	Spent a bit of time to study	Spent a bit of time to study	Spent a bit of time to study	Started Coding
Week 2	Started Coding	Started Coding	Filming the Video/ Finished coding				

SPRINT RETROSPECT (How to Improve)

What went well:

Nothing. Backend is the most difficult thing and I still have a hard time grasping it

What went wrong:

The former code has been wiped out due to hardware malfunctioning, plus I am currently a working student.

How the problem was solved:

I rushed to remake everything from the scratch but the quality is very low
